DOZA DE APARAT

DA
N-00470

- Produsul este utilizat in instalatii electrice pentru incorporarea si fixarea aparatelor electrice de joasa tensiune (intreruptoare, prize).

CARACTERISTICI TEHNICE:

- Tensiunea maxima de utilizare: 440V.
- Tip material doza: masa plastica.
- Metode de instalare: sub tencuiala.
- Tipul instalatiei: - montura sub tencuiala, in pereti sau tavane din solid neinflamabil.
- conceput pentru a fi montat dupa procesul de constructie.
- Dimensiuni interioare (mm) :66x62x40.
- Distanta de prindere a aparatelor (mm) : 60.
- Distanta axiala intre doua doze (mm) : 71.
- Diametrul maxim a tubului PVC (mm) : Ø20.
- Standard de referinta: SR CEI 60670:1995.
